IBIZA

SPRING/SUMMER 2013

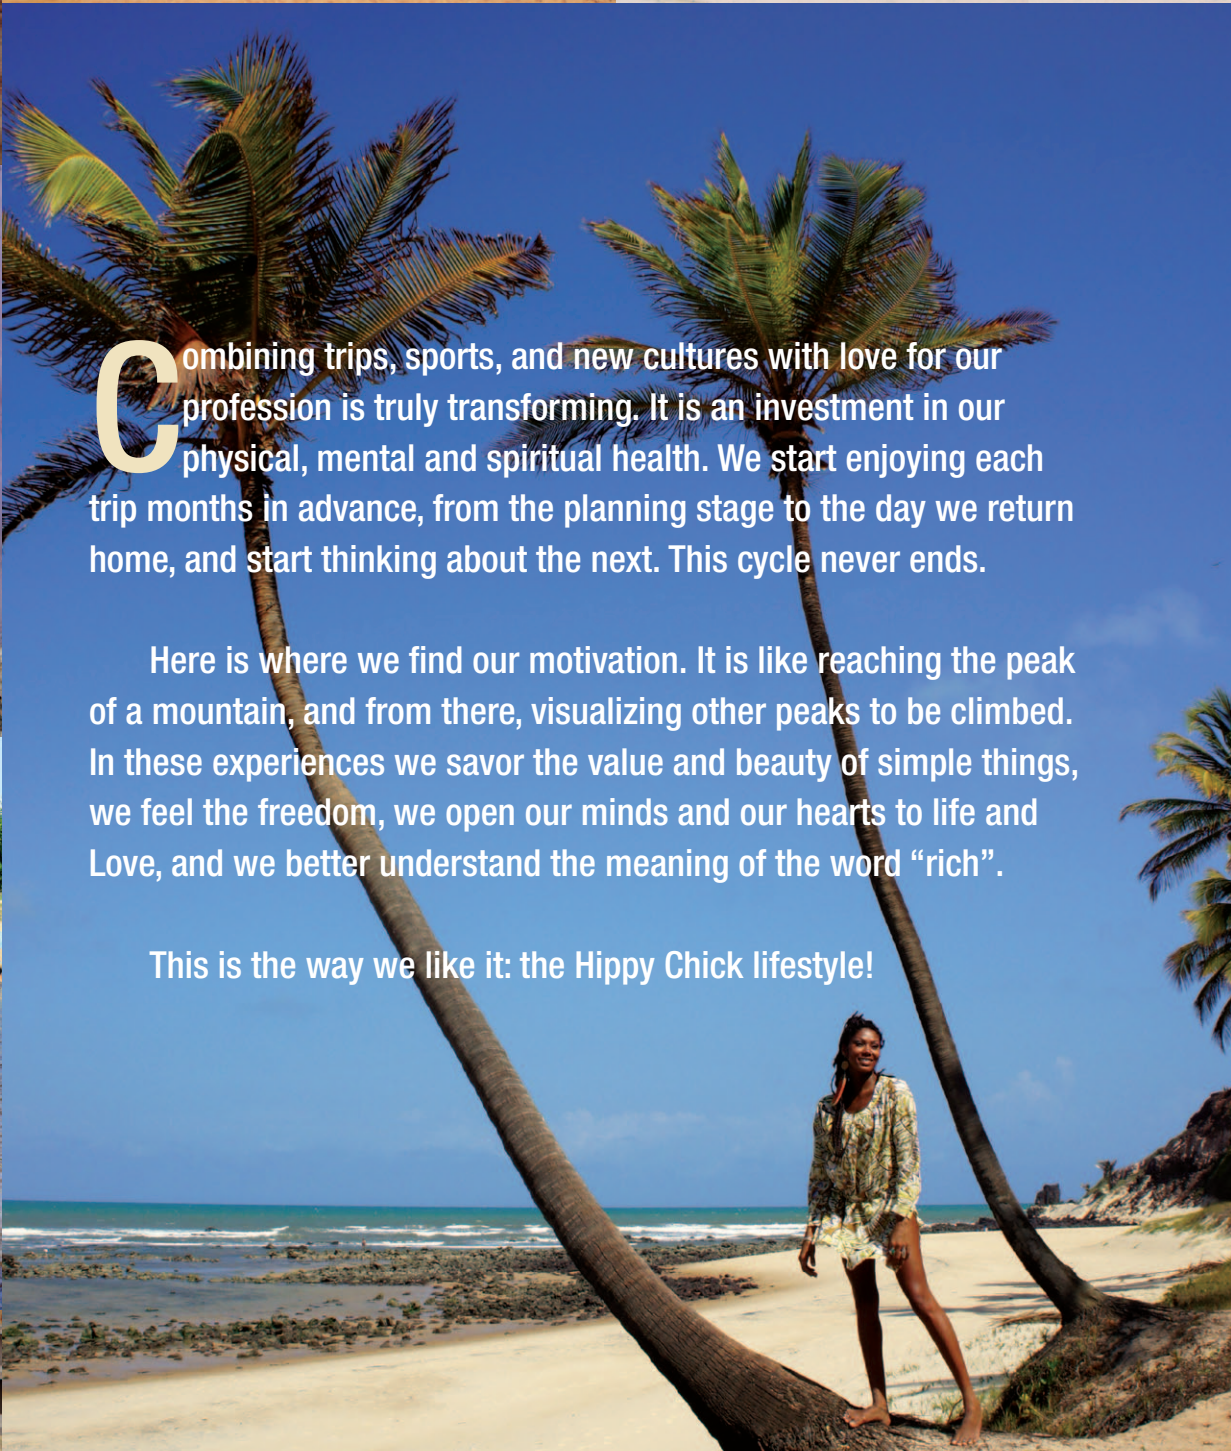

*Life is perfect! Jah bliss!  
Live your dreams...*

Combining trips, sports, and new cultures with love for our profession is truly transforming. It is an investment in our physical, mental and spiritual health. We start enjoying each trip months in advance, from the planning stage to the day we return home, and start thinking about the next. This cycle never ends.

Here is where we find our motivation. It is like reaching the peak of a mountain, and from there, visualizing other peaks to be climbed. In these experiences we savor the value and beauty of simple things, we feel the freedom, we open our minds and our hearts to life and Love, and we better understand the meaning of the word “rich”.

This is the way we like it: the Hippy Chick lifestyle!
